SAVE OUR EARTH

The environmental problems of planet Earth

by: Delikatna-Grin Kateryna

What is Earth Day?

Earth Day is celebrated annually on 22 April.

It was first celebrated in 1970 to raise awareness of environmental issues.

It is a global event involving more than 1 billion people.

It is a day for reflection, education and action for the well-being of the planet.

Why Does Our Earth Need Help?

Forests are being destroyed.

Oceans are filled with plastic.

Air and water are being polluted.

Animals are losing their homes.

If we don't act now, future generations will suffer.

Litter

Streets, beaches and nature are filled with litter.

Deforestation

Forests are being destroyed for timber.

Water pollution

Rivers and oceans poisoned by chemicals and plastics.

Hazardous gas waste

Factories and cars that emit harmful gases.

Impact of Climate Change

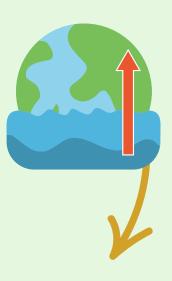

Rising temperatures

Hotter days and melting glaciers.

Wildfires

Spreading rapidly, destroying homes and wildlife.

Sea level rise

Coastal cities are at risk of flooding.

Extreme weather

More hurricanes, droughts and storms.

How Can We Help?

- Recycle and reduce waste.
- Plant trees and protect green spaces.
- Use less water and electricity.
- Ride a bike or walk instead of using a car.
- Support environmentally friendly products and companies.

Small Actions, ~ Big Impact

Infographic

Statistics show that there is an urgent need to take action to protect our planet. Small steps, such as reducing plastic use, saving trees and recycling, can make a big difference to conserving resources and improving our environment. Let's take responsibility and work together for a healthier future.

ENVIRONMENTALL FACTS

8 MILLION TONS of plastic enter

oceans yearly

1 TREE can produce enough oxygen for 4 people

RECYCLING 1 TON of paper saves 17 trees

5620 lite/s saves 17 trees and 26.000 liters of water
